

Managed Portfolio Service - Sustainable REAL2

Objective

Sustainable Real2 aims to provide a minimum real return of 2% p.a. above the rate of Consumer Price Inflation (CPI) over a 7 year rolling period by only investing in funds which have been assessed internally to be more sustainable than peers.

Risk is managed through both its fund selection and its asset allocation. The strategy will have an emphasis towards investments that provide capital appreciation. Investments will be made on a multi-asset basis via funds.

Information in this factsheet relates to the model on the Transact platform and performance on other platforms may vary slightly.

Effective 31 January 2024, City Asset Management has moved to rebalancing our Managed Portfolio Service on a quarterly basis. Going forwards, rebalancing will occur on the last business day of January, April, July and October annually.

Portfolio Information

Portfolio Benchmark	CPI+2%
Portfolio Charge	0.25%
Trailing 12 Month Yield	3.46%

Why Real Returns?

Our mission is to make our clients wealthier.

To create wealth, a client's investment needs to grow at a faster rate than the cost of living (inflation).

To achieve this, we use benchmarks linked to the cost of living plus an additional, annual real return. These benchmarks have never fallen in value since the UK's measure of inflation, the consumer price index (CPI), was introduced in 1997.

We believe that the benchmarks you use to judge us by shouldn't fall just because the stock market does.
